

Redmine - Defect #28204

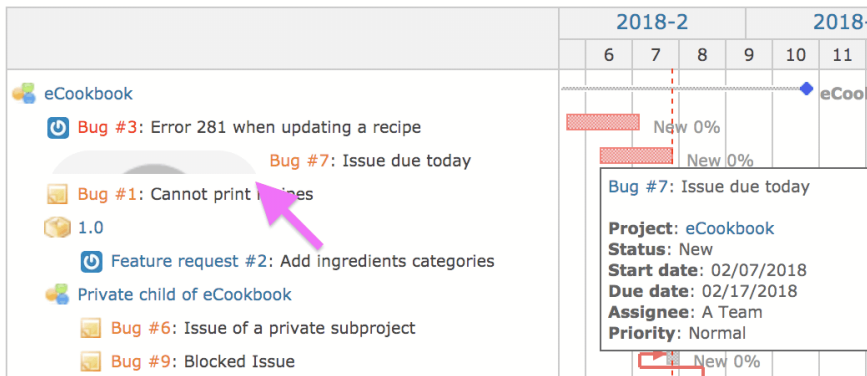

Too large avatar breaks gantt when assignee is a group

2018-02-17 10:37 - Go MAEDA

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Gantt	Estimated time:	0.00 hour
Target version:	3.3.7	Affected version:	3.3.6
Resolution:	Fixed		

Description

A 128px wide avatar icon breaks gantt view when the assignee of an issue is a group and "Use Gravatar user icons" setting is enabled.

The problem is introduced in Redmine 3.3.6 and 3.4.4 by [#26699](#). The cause is that the HTML doesn't include "width" and "height" option because `image_tag` in Rails 4 doesn't accept an integer value for "size" option (Rails 5 accepts both integer and string value, so the current trunk is not affected).

Redmine 3.4 (`img` element doesn't have "width" and "height" attributes):

```

```

The current trunk (`img` element has "width" and "height" attributes):

```

```
