Description Dear, I would like to report that there is lack of possibility to set access to issues for Watchers if the issues visibility is set as "Issues created by or assigned to the user". In general it is possible to set the issues visibility as "ALL issues" but this is not a good solution when you want to limit access to some issues for certain people (more than author and assigned to). Therefore, I kindly ask developers for modifying existing or adding a new option of issues visibility that would provide access for the author, the assigned and additionally for the watchers.
