

Redmine - Defect #28228

REST API Parameter GET /issues.json?assigned_to_id=me doesn't work

2018-02-21 11:21 - vishal gohil

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	3.3.3
Resolution:	Cant reproduce		
Description I want to query only for Issues which are assigned to one user. Example Redmine-User-Login ist "vishal-px" so I hoped that GET /issues.json?assigned_to_id=me will deliver issues assigned to vishal-px Even if I try GET /issues.json?assigned_to_id=342710 it doesn't work. It always returns the blank response. <pre>{ issues: [], total_count: 0, offset: 0, limit: 25 }</pre> Is there any solution for this bug? regards Vishal			

History

#1 - 2018-02-22 00:25 - Mischa The Evil

- Status changed from New to Closed
- Priority changed from Urgent to Normal
- Resolution set to Cant reproduce

Both types of request are working correctly on [source:/branches/3.4-stable@17205](#). I can't reproduce your issue. It looks like you are not doing authentication right, see [Rest_api#Authentication](#).

As we don't provide support through issues, I'll close this issue. If you have further questions, please ask them in the forums (and see [submissions](#) and [How to request help](#) for some guidance).

#2 - 2018-02-22 05:01 - vishal gohil

Thank you [Mischa The Evil](#), After setup of Basic authentication, my problem is solved.
