**Redmine - Defect #28322**  
**Commit messages referencing issues should stop at line breaks**  
2018-03-12 09:53 - Gregor Schmidt

</tbody>
</table>

**Description**

When referencing an issue via commit message, the matching should stop at line breaks. Otherwise, unexpected things may happen.

E.g given the following commit message:

```
Initial version of Feature #123

Includes the following changes:

#124 some UI fixes
#125 still work in progress
```

the current implementation will mark #125 as fixed. I think, this is unexpected.

I've attached a patch, which replaces all \s with [:blank:] in the relevant regular expressions. Those matchers are equivalent, but [:blank:] does not match \r\n. I've also added a test.

This bug was identified by Holger Just from Planio.

**History**

#1 - 2018-03-12 09:59 - Jan from Planio www.plan.io
- Target version set to Candidate for next minor release

#2 - 2018-03-12 14:28 - Go MAEDA

Thank you for detecting and fixing this issue, it looks good to me.

But I am afraid that some people make use of the current behavior, like the following example.

Refs:

#1, #2, #3
