Description			
When you enter "h1, h2, h3" paragraph begins from there, and paragraph mark (¶) will be displayed by mouse hover. paragraph.png In case of "h4, h5, h6" There is a paragraph mark, but it is not displayed because there is no setting to display. As "h4, h5, h6" is also the beginning of a paragraph like "h1, h2, h3", a paragraph mark should be displayed.

You can solve this problem by adding a CSS selector like this:

```
diff --git a/public/stylesheets/application.css b/public/stylesheets/application.css
