

Redmine - Defect #28340

Plugin Tutorial doesn't work

2018-03-15 09:00 - Grigoriy Vasilchenko

Status:	Closed	Start date:	
Priority:	Low	Due date:

Target version:		Affected version:	3.4.4
Resolution:	Fixed		
Description Ruby 2.4.3 Rails 4.2.8 Redmine 3.4.4 Hello. I tried to create plugin using step by step plugin tutorial and there were some problems. I had to make several corrections to make plugin working. Since I'm newbie to ruby, rails, redmine - there is no confidence in rightness of my adjustments. Paragraph "Extending the project menu": 1. I replaced @polls = Poll.find(:all) with @polls = Poll.all <pre>def index @project = Project.find(params[:project_id]) @polls = Poll.find(:all) # @project.polls end</pre> 2. After clicking 'Yes' or 'No' error page was displaying. To solve this I modified method 'vote' ('redirect_to' invocation) to: <pre>def vote poll = Poll.find(params[:id]) poll.vote(params[:answer]) if poll.save flash[:notice] = 'Vote saved.' end redirect_to :action => 'index', :project_id => params[:project_id] end</pre> and added 'project_id' parameter in 'link_to' index.html.erb: <pre><% @polls.each do poll %> <p> <%= poll.question %>? <%= link_to 'Yes', { :action => 'vote', :id => poll[:id], :answer => 'yes', :project_id => @project }, :method => :post %> <%= poll.yes %> / <%= link_to 'No', { :action => 'vote', :id => poll[:id], :answer => 'no', :project_id => @ project }, :method => :post %> <%= poll.no %> </p> <% end %></pre>

Thank you for sharing the results you tried.

As a result of following the tutorial I confirmed that three problems you pointed out caused an error. And I also confirmed that it will work out by making corrections as you say.

Since find (: all) was deprecated in rails 4, you should use Poll.all.
Since the plug-in tutorial is an old tutorial written at Redmine 2.x (rails 3), I think it should be revised.

#6 - 2020-04-21 06:24 - Mizuki ISHIKAWA

- File *plugin_tutorial.diff* added

- File *plugin_tutorial.textile* added

- File *application_menu.png* added

I modified the plugin tutorial to work on Redmine 4.x and Redmine 3.x.
[plugin_tutorial.diff](#) is the difference between the modified document and the current [plugin tutorial](#).

application_menu.png should be replaced with the attached image.

Thank you for updating the document. Could you update [plugin tutorial](#)? Please feel free to update Wiki pages. Everyone can edit pages.

#8 - 2020-07-01 09:39 - Mizuki ISHIKAWA

I just updated the plugin tutorial.
https://redmine.org/projects/redmine/wiki/Plugin_Tutorial/diff?utf8=□&version=105&version_from=104

#9 - 2020-07-02 04:27 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Fixed
