Redmine - Defect #28393

Sort issue custom fields by position in tracker UI

Target version:	3.3.7			
Resolution:	Fixed		**Affected version:**	

Description
When configuring issue custom fields for a single tracker, the custom fields are order by creation date. Instead they should be ordered by their position.
Attached you may find a patch, implementing the desired behavior. Furthermore, it's changing the line IssueCustomField.all.sort to IssueCustomField.sorted in the TrackersController. The latter will sort the records within the DB, which should be slightly faster.
