Redmine - Defect #2841

View overriding code isn't working for plugins

2009-02-25 22:21 - Chris Peterson

Status:	Closed		**Start date:**	2009-02-25

Category:	Plugin API		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Fixed		**Affected version:**	

Description

I have created an empty plugin. I have added the file index.rhtml with some changes to my_plugin/app/views/projects/index.rhtml. The plugin shows up on the Admin -> Plugins page. However I do not see the changes when I goto Projects. I migrated the plugin database and restarted redmine to no avail. Is there an extra step that I am missing?

output of svn info:

```

Forum Discussion: http://www.redmine.org/boards/3/topics/show/4283

Plugin is attached. If the plugin works properly, the projects page will change to have the description next to the projects in a table instead of below the projects. Also the ability to access all issues and activities has been removed.

Associated revisions

Revision 2525 - 2009-02-26 09:59 - Jean-Philippe Lang

Applies r1723 on Engines update to allow view override (#2841).

History

- Status changed from New to 7

- Assignee set to Eric Davis

I'll take a look at this one. Doesn't look like my custom design is being applied either. Guessing the view override changes to Engines didn't get merged in with Rails 2.2.x

#2 - 2009-02-26 09:58 - Jean-Philippe Lang

- Status changed from 7 to Closed

- Resolution set to Fixed

Fixed in r2525.

#3 - 2010-02-25 13:01 - Jérémie Delaitre

- Status changed from Closed to Reopened

I have tried the plugin on Redmine 0.9.2 (debian package) without success.
Is there any rake command to call to allow view overriding or is view overriding working differently in 0.9 ?

#4 - 2010-02-28 05:41 - Eric Davis

- Status changed from Reopened to Closed

View overriding is working in 0.9. The Debian package uses a patched Redmine using a different version of Rails and the Rails Engine which might have broken this.
