Redmine can register plugin same ID with registered one. Currently, below problems exist.

- @registered_plugins[id] is overwritten.
- /admin/plugins shows only one plugin
- but load_path, view_path, ... are changed

I want to reject and log warning second or later plugins.

functional/settings_controller_test.rb was already registered foo plugin twice. I cleared on teardown to pass unit test.

This ticket related to #27705.

---

History

#1 - 2018-04-02 07:01 - Go MAEDA
- Category changed from Plugin Request to Plugin API
- Target version set to Candidate for next major release

We see the following error when plugin IDs conflict. It is difficult to debug. I think the patch helps to find the cause of such problems.

```
$ bundle exec rails c
/path/to/redmine/lib/redmine/menu_manager.rb:370:in `add_at': Child already added (RuntimeError)
  from /path/to/redmine/lib/redmine/menu_manager.rb:387:in `add'
  from /path/to/redmine/lib/redmine/menu_manager.rb:305:in `push'
  ...
```
