| Target version: | | Affected version: | 0.8.1 |
| Resolution: | Duplicate | | |
| Description When a new ticket is opened, or when editing a ticket, all versions are shown in the "expected version". Although some (most) of them could be closed. Because of this, it often happen that reporter use the first one.. This is bad because <ul style="list-style-type: none">the version has already been releasedthe version appears again in the roadmap (with a <i>huge</i> numbers of days late)the bug needs to be edited by us Though.. i'm aware there's no real notion of 'closed' version in redmine. My understanding is that versions with date and all related tickets closed do not appear on the roadmap anymore.. and that's all, right ? | | | |

History

#1 - 2009-02-26 06:38 - Anonymous

This is a duplicate of [#1666](#), which is in turn a duplicate of many others :)

I've been using the patch that Artem Vasiliev made in [#1676](#) that was based on some of my original patch. It works pretty well: you don't explicitly close versions, but they are considered closed if it is past their due date and they have no open issues.

#2 - 2009-02-26 09:45 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Duplicate

Indeed. See [#1245](#).
