Redmine - Feature #28461

Make defaults for version sharing configurable

Description

Hello,

I have a feature request for the version sharing in Redmine. The default setting for version sharing is "not shared", but we want to set the default value to "With project hierarchy" for all new versions. Sometimes the creator of a new version forgets to change the sharing setting. So it would be wonderful if the defaults could be changed.

Could this be implemented in Redmine?
