

Redmine - Feature #28471

Query links for subtasks on issue page

2018-03-30 12:12 - Sebastian Paluch

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:	4.2.0		
Resolution:	Fixed		
Description The header on issue page "Subtasks" list issues, in some way, with some defaults columns. It would be very helpful if the section header could be clickable link to issue queries showing those issues: - Subtasks should link to issue query with filter parent "contains" the issue number It would be good to have same thing for "Related issues" but there seems to be no filter allowing to show all types of relations.

Revision 20321 - 2020-11-10 04:41 - Go MAEDA

Query links for subtasks on issue page (#28471).

Patch by Bernhard Rohloff.

Revision 20718 - 2021-01-18 08:11 - Go MAEDA

Some fixes for r20321:

- Include only visible issues in subtasks stats
- Get subtasks using only one query
- Show all subtasks count as badge
- Add tests

Patch by Marius BALTEANU.

History

#1 - 2018-03-31 07:00 - Go MAEDA

It is a nice idea. Many people have requested to add more columns to the list of subtasks and related issues. It will be the solution to the request if we can move to the issues list with one click.

#2 - 2018-06-21 07:36 - Ewan Makepeace

+1 - I would dearly love this.

#3 - 2019-08-02 09:19 - Ewan Makepeace

Specofically whjen I am in the Roadmap I can jump from the simple list of issues in a target version such as:

<http://www.redmine.org/versions/127>

To a query on either All Issues:

http://www.redmine.org/projects/redmine/issues?fixed_version_id=127&set_filter=1&status_id=%2A

Or just Open or Closed. This is hugely useful as I can then sort, group and filter to get the answers I need.

However when subtasks are grouped under a parent task there is no shortcut. I can search all issues by Parent (which is often enough) but:

1. I would like to see this as a shortcut on the issue page (just above subtasks)
2. I often have nested groups of tasks and so really want to see all subtasks and not just those that are a direct child of the current task.

```
SELECT i.*
FROM issues i
JOIN issues p
  ON p.root_id = i.root_id
  AND p.lft < i.lft
  AND p.rgt > i.rgt
WHERE p.id = @PARENT_ID;
```

#4 - 2019-09-05 06:41 - Bernhard Rohloff

- *File query_links_for_subtasks.diff added*

This patch implements Ewan's proposal. It's quite convenient to filter subtasks this way. Good idea!

#5 - 2019-09-05 07:01 - Bernhard Rohloff

- *File subtask_query_links.png added*

here's how it looks now...

subtask_query_links.png

#6 - 2019-11-28 00:40 - Anonymous

+1, it's a green light from me ;-)

#7 - 2019-12-15 09:21 - Go MAEDA

- *Target version set to Candidate for next major release*

#8 - 2020-04-25 11:23 - Marius BĂLTEANU

- *File subtasks.png added*

I reworked a little bit the patch proposed by Bernhard:

subtasks.png
What do you think?

#9 - 2020-04-26 11:27 - Bernhard Rohloff

IMHO, it looks like a nice improvement. :-)

#10 - 2020-10-27 11:22 - Bernhard Rohloff

- *File query_links_for_subtasks_marius_flavor.diff added*

I've added a new patch with Marius' improvements. In my opinion it would be a nice improvement to ship with [4.2.0](#). What do you think?

#11 - 2020-11-05 06:16 - Go MAEDA

Thank you for updating the patch. I think the feature is nice but the number of open/closed issues and filtered issues don't not match if subtasks has its subtasks (grand child).

See the example below. The issue has a subtask (#15 "child"). And the subtask has a subtask (#16 "grand child"). Redmine says that there are 2 open issues.

clipboard-202011051408-i3dmb.png
However, after you click the "2 open" link, the issues list displays only 1 issue.

clipboard-202011051409-nusza.png

#12 - 2020-11-05 09:21 - Go MAEDA

Maybe [#28471#note-11](#) can be fixed by using "contains" operator instead of "is" operator.

#13 - 2020-11-05 15:25 - Bernhard Rohloff

- *File query_links_for_subtasks_marius_flavor_V2.diff added*

Thank you Maeda san for testing my patch. Here's a slightly better version of my previous patch including your suggestion. It's indeed better to do it this way. :-)

#14 - 2020-11-07 05:15 - Go MAEDA

- *Target version changed from Candidate for next major release to 4.2.0*

Bernhard Rohloff wrote:

Thank you for updating the patch. The patch now looks good. Setting the target to 4.2.0.

#15 - 2020-11-10 04:42 - Go MAEDA

- *Subject changed from Make "Subtasks" section headers a links to issue query to Query links for subtasks on issue page*
- *Status changed from New to Closed*
- *Assignee set to Go MAEDA*
- *Resolution set to Fixed*

Committed the patch. Thank you for your contribution.

#16 - 2020-11-10 10:06 - Marius BĂLTEANU

- *Status changed from Closed to Reopened*

We should add some functional tests.

#17 - 2020-11-11 08:51 - Bernhard Rohloff

Here's some test code. Since I'm not very used to rails testing, I'm not sure if it's sufficient enough.

Thanks Bernhard for the tests.

Reviewing them, I found out that the current implementation has two issues:

- issue visibility is not checked
- there are quite many queries to get the subtasks

I took the liberty to rewrite a little bit the current implementation in order to:

- fix the issue visibility
- get subtasks using one query by grouping them
- move the entire logic from view to helper
- change the layout to show the subtasks count as badge
- finalise the tests

I've fixed the issue by casting the values returned from the database to boolean. Now the tests pass on all three database types:

<https://gitlab.com/redmine-org/redmine/-/pipelines/225982433>

Thank you Marius for reviewing and improving my work. I really like the badge style.

BTW my implementation was shamelessly copied from the versions/_overview partial found in the roadmap. So we may have room for improvements over there, too.

Thank you for posting the [0001-Include-only-visible-issues-in-subtasks-stats.patch](#) but the test fails if you run it with Ruby 2.4.

```
$ ruby test/functional/issues_controller_test.rb
Run options: --seed 49701
```

```
# Running:
```

```
.....F
```

Failure:

```
IssuesControllerTest#test_show_should_show_subtasks_stats [test/functional/issues_controller_test.rb:2354]:
Expected at least 1 element matching "span.open a[href="/issues?parent_id=~1&set_filter=true&status_id=o"]", found 0..
Expected 0 to be >= 1.
```

```
bin/rails test test/functional/issues_controller_test.rb:2343
```

```
.....S.....
.....S.....
.....S.....
.....F
```

Failure:

```
IssuesControllerTest#test_show_subtasks_stats_should_not_link_if_issue_has_zero_open_or_closed_subtasks [test/functional/issues_controller_test.rb:2367]:
Expected at least 1 element matching "span.open a[href="/issues?parent_id=~1&set_filter=true&status_id=o"]", found 0..
Expected 0 to be >= 1.
```

```
bin/rails test test/functional/issues_controller_test.rb:2361
```

```
.....
```

This is because issue_path method returns a different value depending on the version of Ruby.

```
# Ruby 2.4
(byebug) issues_path(parent_id: "~1", set_filter: true)
"/issues?parent_id=%7E1&set_filter=true"
```

```
# Ruby 2.5 or later
(byebug) issues_path(parent_id: "~1", set_filter: true)
"/issues?parent_id=~1&set_filter=true"
```

- File 0002-Unescape-href-values-before-asserting.patch added

- Assignee changed from Marius BĂLTEANU to Go MAEDA

Can you try on Ruby 2.4 using the attached patch, please? It should pass now. If still doesn't, I will create a local environment with 2.4.

Thank you, I confirmed that there is no test failure with 2.4.
