Redmine - Defect #28529

Plugin settings trouble

2018-04-11 12:27 - Vladimir Kh

Status:	New	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:	Plugin API	**Estimated time:**	0.00 hour
Target version:			
Resolution:		**Affected version:**	

Description

The problem is that now is impossible to call the option of plugin setting via symbol, only via the string.
now:

```
irb(main):006:0> Setting.plugin_redmine_ckeditor["skin"]
=> "kama"
irb(main):007:0> Setting.plugin_redmine_ckeditor[:skin]
=> nil
irb(main):008:0> Setting.plugin_redmine_ckeditor.class
=> Hash
irb(main):009:0> puts Redmine::VERSION
3.4.4.stable
```

earlier:

```
irb(main):001:0> Setting.plugin_redmine_ckeditor[:skin]
=> "kama"
irb(main):002:0> Setting.plugin_redmine_ckeditor["skin"]
=> "kama"
irb(main):003:0> Setting.plugin_redmine_ckeditor.class
=> ActionController::Parameters
irb(main):004:0> puts Redmine::VERSION
3.3.4.stable
```

So now some plugins are not working correctly.
This is connected with issue #26393 and r16812

+1

I am using some plugin (redmine knowledge base) which also used symbols as settings keys, which works fine in Redmine 3.2 but fails on Redmine 3.4.

A bug introduced in 3.4 I guess?
