Redmine - Patch #28564
JSON API responses cannot have elements named 'request' or 'response'

2018-04-17 03:42 - Jens Krämer

Description

I stumbled upon this while creating a Plugin with an API.

The problem is that Builders::Structure declares attr_accessor :request, :response. As a consequence, these get called instead of Structure#method_missing when doing api.request or api.response in a .rsb template.

This patch adds a test illustrating the problem and replaces the accessors with direct instance variable usage.

Associated revisions

Revision 17617 - 2018-11-03 09:11 - Go MAEDA

Removes request and response accessors from Structure class (#28564).

Patch by Jens Krämer.
