Redmine - Feature #2857

One click filter action in activity view.

Target version:	0.8.2			
Resolution:	Fixed			

Description

Currently the 'workflow' on the activity view is that you de-/select
the checkboxes of the parts and press the apply button.

Yet it gets cumbersome if you want to check for example changes for the wiki only.
You have to deselect all but the wiki and click apply.

So in other words often you only want to see the activity for one item.
You do this often, so it would be very nice to have this need least amount of clicks.

I would suggest that by clicking on the name next to the checkbox (for example wiki),
the site would show only the activity for the given item.

Checkboxes plus apply functionality should remain.

The requested changed and feature is that clicking on the name/string shows the
activity view for the given item, instead of currently toggling the checkbox of
the given item.

Thank you!

Thanks, but it was an easy one.

#4 - 2009-02-28 11:50 - kju kju

Cheers. It is very much appreciated. :)

#5 - 2009-03-07 12:15 - Jean-Philippe Lang

- Status changed from Resolved to Closed

Merged in 0.8-stable in [r2556](#).
