Category:	Estimated time: 0.00 hour
Target version:	Affected version:
Resolution: Fixed	

Description

I installed redmine following the doc/INSTALL and the page projects/testproject/issues/new shows a blank page. The browser's 'view source code' is empty.

Revision [r2538](#) show a blank page.

Version 0.8.1 show the correct error message "No tracker is associated to this project. Please check the Project settings."

```
$ svn co svn://rubyforge.org/var/svn/redmine/trunk redmine-trunk
$ cd redmine-trunk/
$ rake config/initializers/session_store.rb
$ cp config/database.yml.example config/database.yml
$ rake db:migrate
$ script/server
```

Loaded the default data at Administration page.

Created a project called "teste" without selecting any tracker, and when I go to "New issue", i get a blank page, instead of the

Revision 2542 - 2009-03-01 11:15 - Jean-Philippe Lang

Fixed that some error messages were not displayed (#2866).

History

#1 - 2009-03-01 00:15 - Enderson Maia

The same occurs if you don't set a default ticket status.

The lines responsible for this are 123, 135.

app/controllers/issues_controller.rb

```
116 def new
117   @issue = Issue.new
118   @issue.copy_from(params[:copy_from]) if params[:copy_from]
119   @issue.project = @project
120   # Tracker must be set before custom field values
121   @issue.tracker ||= @project.trackers.find((params[:issue] && params[:issue][:tracker_id]) || param
s[:tracker_id] || :first)
122   if @issue.tracker.nil?
* 123     flash.now[:error] = 'No tracker is associated to this project. Please check the Project settings
.'
124     render :nothing => true, :layout => true
125     return
126   end
127   if params[:issue].is_a?(Hash)
128     @issue.attributes = params[:issue]
129     @issue.watcher_user_ids = params[:issue]['watcher_user_ids'] if User.current.allowed_to?(:add_is
sue_watchers, @project)
130   end
131   @issue.author = User.current
132
133   default_status = IssueStatus.default
```

```
134     unless default_status
* 135         flash.now[:error] = 'No default issue status is defined. Please check your configuration (Go to
"Administration -> Issue statuses").'
136         render :nothing => true, :layout => true
137         return
138     end
```

#2 - 2009-03-01 11:14 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Fixed

Indeed. The behaviour of `render :nothing => true, :layout => true` changed with Rails 2.2.
It's fixed in [r2542](#).
