Redmine - Defect #2867

Undefined Method (l_YesNo) Being Called

Status:	Closed	**Start date:**	2009-03-01

Target version:			
Resolution:	Fixed	**Affected version:**	

Description

I upgraded our company copy of Redmine today to trunk and migrated the db, cleared cache, made sure all the version requirements have been met, etc. and ran into an issue in:

```
app/helpers/custom_fields_helper.rb:78:       l_YesNo(value == "1")
```

We are using some custom fields, which is why we are running into this problem but those who aren't using boolean custom fields shouldn't experience this. The defect has effectively locked us out of creating issues, which is why I've set it's priority to Urgent.

The file in question here is obviously source:trunk/app/helpers/custom_fields_helper.rb#78

I don't think this is necessary for this particular defect but I will supply the system details anyways:

- mysql Ver 14.12 Distrib 5.0.51a, for debian-linux-gnu (i486) using readline 5.2
- ruby 1.8.6 (2007-09-24 patchlevel 111) [i486-linux]
- Rails 2.2.2
- Redmine revision 2538

Here's the log data:

```
