<b>Resolution:</b>	Fixed		
<b>Description</b>			
It would be nice to have the ability to include the custom fields in the search function.

- Status changed from New to Closed
- Resolution set to Fixed

You just need to mark the custom field as searchable.

My field was defined as an integer field, so this option was not available. After switching to string and using a regexp to ensure integer input, search is available. Thanks!

Is there any possibility to search custom fields from users? For example if I add a custom field called "skills" to users I could then search for users with the skills I currently needed.
