Description

This ticket is related to [#17071](#) and [#17579](#).

In [Zitec,](#) we are trying to find a clean UI/UX solution to allow users to add multiple entities when performing multiple searches in modals like Add Watchers, Add members, Add projects. The current issues are very well explained in the related tickets.

We came up with 3 proposals:

1. **add_to_bottom.jpg** which display the selected entities (users for example) under the search results section:
   add_to_bottom.jpg

2. **add_to_right_with_checkbox.jpg** which display the selected entities to the right of the search results

   add_to_right_with_checkbox.jpg
3. **add_to_right_with_x.jpg** same as 2, but an "X" icon is used to remove the selected entities.

   add_to_right_with_x.jpg
Personally, I like the 3rd solution. Any feedback is welcome.

I like the third version the most, too. The list view seems very handy to me and the red X makes it clear that the item is removed from that list. A disappearing checkbox item feels very odd to me.
