Redmine - Defect #28793

Redmine replaces tabs with spaces in code blocks

2018-05-16 18:57 - Anton Shepelev

Status:ConfirmedStart date:Priority:NormalDue date:

Assignee: % Done: 0%

Category: Text formatting Estimated time: 0.00 hour

Target version:

Resolution: Affected version: 3.4.4

Description

Regardless of whether I use Markdown or Textile, Redmine always replaces tabs with spaces in code blocks, which makes the code read-only, i.e. one cannot copy and paste it into their program, so I have to attach source files to issues or send them in separate e-mails.

The underlying Markdown and Textile text is correct but is rendered into HTML wrong.

Code blocks should present code as it is written: spaces should be spaces and tabs should be tabs.

My Redmine environment:

```
Environment:
                                  3.4.4.stable
 Redmine version
                                  2.3.3-p222 (2016-11-21) [i386-mingw32]
 Ruby version
 Rails version
                                  4.2.8
                                  production
 Environment
 Database adapter
                                  Mysq12
SCM:
  Subversion
                                  1.8.16
 Filesystem
Redmine plugins:
 no plugin installed
```

The behavior of Textile formatter can be changed with the following patch, but I think it is not easy to change the behavior of Markdown formatter because is done in Redcarpet gem.

#4 - 2020-07-27 15:04 - Anton Shepelev

Go MAEDA:

The behavior of Textile formatter can be changed with the following patch, but I think it is not easy to change the behavior of Markdown formatter because is done in [Redcarpet gem](https://github.com/vmg/redcarpet).

One solution would be to fix it in **Markdown** using your patch and create an issue with the **Redcarpet** project. Transparent code formatting is the more sensible behavior. If they want to keep the spaces for aesthetical reasons, then preserving tabs should be an option, whereas inconsistent behavior between formatters shall be shunned like the plague.
