Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	

Description

I tried to implement this gravatar support in redmine application.

I Have created the gravatar image in www.gravatar.com.I Have created a method in application helper named "render_gravatar".Which calls the image i created in www.gravatar.com

But the problem is that Eventhough i created a gravatar image.It still displays the default blue color gravatar image.I tried clearing the cache but i am not able to see the Gravatar image

Which browser are you using?

I have the same issue in IE6. In IE7 works fine for me.

#2 - 2009-03-04 18:03 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Invalid

Please read Submissions. And note that gravatar support is available in current trunk.

#3 - 2009-03-05 10:24 - karthikeyan rangaswamy

I have checked the gravatar support in both IE and Mozilla.But i am able to see the original gravatar image i have uploaded in my account page.But in other pages it still shows the default blue color gravatar image only
