Target version:			
Resolution:	Invalid	**Affected version:**	3.4.5

Description

I have added the redmine_favorite_projector plugin,

When I write down very long name , its display very long width table with 1 row, also its happened on Description column with long information.

I have checked the plugin setting files , I cant find any .css file can set.

Could you please tell me how to fix the width of each part column?

Thanks and BR.
