

Redmine - Feature #2911

Add time filter to issues summary report

2009-03-05 13:38 - Rodrigo Rosenfeld Rosas

Description I've seen a lot of feature requests around custom reports. All of them seems to need some time to implement. Until there, I think it should be pretty simple to add some time filter to the already existing issues summary report. It would be great to see the same report for the last week or last month instead of all issues in project, especially when redmine is used for help-desk purposes.

+1 to time filtering on the issue summary report.

We like to report number of tickets per day/week/etc and this page would be perfect if it wasn't for all time.

+1 Really want this.

Tried to create similar headline reports in RedmineReport..not possible there.
