Description

I think it would be better to show "Latest news" box above "Members" box.

Currently, "Latest news" box is displayed under the Members page. I think we can resolve the following problems by swapping positions.

- "Members" box may become longer if the project has dozens of members. As a result, members cannot see Latest news" box without scrolling
- The frequency of updates and importance of information is higher in "Latest news" box than in "Members box".

Therefore, I suggest switching positions of those boxes.

I'm in favor for this patch as it shows me more relevant information right on top of the page.
