Redmine - Patch #29185

Add my_page to the application menu

2018-07-04 10:30 - Mizuki ISHIKAWA

Status:	New		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	UI		**Estimated time:**	0.00 hour
Target version:				

Description

This patch makes the following two changes

- Add my page to application menu
- Change to display application menu on my page screen

This patch makes it easier to move from My Page to issues and activities.

With this patch, there would be two top-level links to the My Page (similar to the **Projects** link/tab).

I think this should be unified to avoid having multiple links with the same text point to the same (or slightly different?) views on all or most pages.

Indeed, that are my thoughts too (posted in #29184).
