<b>Description</b>			
It's possible to add custom fields to groups, but they are no where displayed but in the edit view within the admin area.			
The attached patch extends groups#show to also list custom fields defined for the group. It's targeted at r17428.

Thank you for posting the patch. I think this patch improves the consistency of UI.

But I wonder whether the heading "Attributes" is necessary. /users/:id page does not add such a heading when showing custom fields (see <http://www.redmine.org/users/347> for example). In addition, :label\_attribute\_plural is only used in app/views/auth\_sources/\_form\_auth\_source\_ldap.html.erb.

Do you think we can remove "<h3><%= I(:label\_attribute\_plural) %></h3>" from the patch?

Thank you for reviewing this patch.

I don't have a strong opinion on this one. I've added the sub heading for cosmetic reasons. If you think it's not necessary, this is OK for me.
