We'd like to move to redmine, but an import of existing projects with all their facets is absolutely necessary. Otherwise we must stay with trac :(

Thanks a lot for your great work!

- Status changed from New to Closed

Before processing your Trac database, you need to load the default Redmine configuration as mentioned in [RedmineMigrate](#):

```
rake redmine:load_default_data RAILS_ENV="production"
```

Hallo!

I have similar problem!

But your advise doesn't help me...

#3 - 2011-03-28 15:48 - Pavel Pivovarov

Hello! I confirm, that Error is still present!

Have the same Tracker(#-612886248) expected, got NilClass(#-608353828)

This solution doesn't help!

#4 - 2011-03-28 20:36 - Jean-Philippe Lang

Please, run the task with --trace option and post the error stack trace.

#5 - 2011-03-29 12:36 - Pavel Pivovarov

```
[root@redmine redmine]# RAILS_ENV="production" rake redmine:migrate_from_trac --trace

Maybe this information may be useful too:

```
[root@redmine redmine]# ruby --version
ruby 1.8.6 (2010-02-05 patchlevel 399) [i386-linux]
[root@redmine redmine]# gem list rails
```

```

#7 - 2011-03-29 14:03 - Etienne Massip

Not sure it will resolve your issue, but Redmine requires Rails 2.3.5 since 0.9, you have to consider upgrade.

#8 - 2011-03-30 09:26 - Pavel Pivovarov

I am update rails for version 2.3.5 but it's still doesn't work. Crashes with the same error.

#9 - 2011-03-30 09:48 - Etienne Massip

It seems to not find your "Feature" tracker, do you have enabled at least the "Defect" and "Feature" trackers in your project "project" ?

#10 - 2011-03-30 10:40 - Pavel Pivovarov

Brilliant!!! Thank you very much! It's work now very well!
