Description

https://redmine.org TLS config is suboptimal security-wise as attested by the F grade from Qualys SSL tester (https://www.ssllabs.com/ssltest/analyze.html?d=redmine.org). It should be relatively easy and quick to tune it to get to at least C grade.

It is #19160. You can see it in "Related issues" section.

I do not see any "Related issues" section and I cannot access #19160 despite being logged in. Maybe the bug is private.
