**Description**

It seems that PDF export in zh-TW is not functioning correctly in revision 2570. When i open the exported PDF file with acrobat reader, Chinese words are displayed in unreadable words.

Example:

**ASSTD ±M@x - ·s¥\`à # 1624: ³nÄé±ÄÄË**

Fixed in [r2575](#). This was broken by the new locales.

##### #2 - 2009-06-25 13:53 - Todor Dragnev

- File redmine-bg\_BG.png added
- Status changed from Closed to Reopened

Hi, I reopen this bug because I have the same problem with PDF exporting from bg\_BG (utf8) documents.

Export is made from here: <http://demo.redmine.org/issues/1002>

It seems that my installation doesn't suffer from this problem.

-- details of my system --

My system have been reinstalled during the upgrade from fedora 10 to fedora 11 last week.

Ruby and rubygems are provided as an RPM provided by fedora 11.

All other things (rails, rake, mysql, fcgi, rmagick etc.) needed to run redmind are installed by 'gem install'.

Redmine source are downloaded from svn.

Configuration and user files a restored from backup.

Database is restored from backup too.

Everything works fine like in fedora 10.

Attached please find a PDF export from my site.

By the way, mime is running 2792 now.

-- end --

FYI.
