

Redmine - Patch #29424

Convert migration file from 4.2 to 5.2

2018-08-22 13:42 - Enziin System

Target version:			
Description I recently saw Redmine use Rails 5.2.1, which is a good thing. However, upgrading to Rails 5.2.1 does not simply add it to the Gemfile. I have migrated the migration files from 4.2 to 5.2, please consider the patch. The reason for the change: The default id of Rails 3-4 is int, which allows for a maximum of 4.2 billion items. This is not a big number when using Redmine in large-scale applications. Need to replace with bigint(20) in id and foreign key. I tested the patch and confirmed that Redmine works normally after the upgrade.
