

Redmine - Patch #29424

Convert migration file from 4.2 to 5.2

2018-08-22 13:42 - Enziin System

Status: New	Start date:

Target version:	
Description	
<p>I recently saw Redmine use Rails 5.2.1, which is a good thing.</p> <p>However, upgrading to Rails 5.2.1 does not simply add it to the Gemfile.</p> <p>I have migrated the migration files from 4.2 to 5.2, please consider the patch.</p> <p>The reason for the change: The default id of Rails 3-4 is int, which allows for a maximum of 4.2 billion items.</p> <p>This is not a big number when using Redmine in large-scale applications.</p> <p>Need to replace with bigint(20) in id and foreign key.</p> <p>I tested the patch and confirmed that Redmine works normally after the upgrade.</p>
