<b>Resolution:</b>			
<b>Description</b>			
<p>Sometimes when working on large(r) wiki-pages (especially when using large tables) it could be very helpfull if there was a button available (e.g. on the bottom of the edit-window) to switch the wrapping inside the edit-window from on (default) to off (which is currently not possible).</p> <p>This could be seen <a href="#">implemented in a way</a> by <a href="#">DokuWiki</a> for example...</p>
