

Redmine - Feature #29474

Support single ` and triple ``` backquote/backtick syntax

2018-09-01 14:58 - Kamil .

Target version:			
Resolution:	Invalid		
Description Many modern tools like Slack/Github/BitBucket support single backtick ` for special formatting of single line` and triple backtick ``` for longer code fragments ``` this is very convenient. Could you please support that?			

History

#1 - 2018-09-01 15:15 - Marius BĂLTEANU

- Category changed from Issues to Text formatting
- Status changed from New to Closed
- Resolution set to Invalid

Kamil, ``` and ` are already supported if you set the text formatting to Markdown (in Administration). Default setting of Redmine for text formatting is textile (also this instance uses Textile).

In the next Redmine version, the generated output of the "pre" button in Markdown toolbar will be ``` , please see [#22843](#).
