Redmine - Defect #29476

Update net-ldap to 0.16.0

2018-09-02 11:57 - Yuuki NARA

Status:	Closed	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:	Gems support	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Wont fix	**Affected version:**	3.4.6

Description

Redmine 3.4-stable specifies net-ldap 0.12.0 in Gemfile.

There is a known vulnerability, and an update to 0.16.0 is recommended. (CVE-2017-17718)

Redmine trunk has already been updated to 0.16.0.
#24970

Please also implement the same fix for 3.4-stable.

In Github's repository, vulnerabilities are being warned.

```
CVE-2017-17718
The Net::LDAP (aka net-ldap) gem before 0.16.0 for Ruby has Missing SSL Certificate Validation.

Gemfile update suggested:
net-ldap ~> 0.16.0
```

- Related to Patch #29606: Support self-signed LDAPS connections added

#5 - 2018-09-14 07:13 - Go MAEDA

- Category set to Gems support

According to #29606, net-ldap 0.16.0 rejects self-signed certificates by default. It may affect some on-premise installations if we upgrade net-ldap without implementing #29606.

However, in my opinion, the patch #29606 should not be merged into 3.4-stable/3.3-stable branches because it has a database migration.

#6 - 2018-12-18 01:13 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Wont fix

I think we should not update the gem in 3.4-stable branch because there is a compatibility problem I wrote in #29476#note-5. In the worst case, users cannot log in after upgrading.

I recommend upgrading to Redmine 4.0.0 if the vulnerability matters.
