<b>Resolution:</b>	Invalid		
<b>Description</b>			
<p>Hi All, Greetings. I am upgrading our redmine from 2.5.2 to 3.4.5 on a different VM (RHEL 7). While I have configured most of the plugins, I am stuck with wiki page that loads a graph and image. For some reason I am not able to efficiently use or configure wiki_graphviz_plugin. Could someone please help, I guess I am missing some configurations here.</p> <p>I had asked the IT team to install graphviz software as I did not have root access and I could not install the software because of permission issues.</p> <p>Attahced are the screenshots of wiki page in old redmine (where it works fine) and new server where it is not.</p> <p>Redmine Info: Environment: Redmine version 3.4.5.stable Ruby version 2.4.4-p296 (2018-03-28) [x86_64-linux] Rails version 4.2.8 Environment production Database adapter Mysql2 SCM: Darcs 2.8.4 Bazaar 2.5.1 Git 1.8.3.1 Filesystem Redmine plugins: clipboard_image_paste 1.12 forward_to_diffs 0.1 progressive_projects_list 3.0.1 redmine_all_files 0.0.3 redmine_checklists 3.1.11 redmine_ckeditor 1.1.5 redmine_didyoumean 1.2.0 redmine_favourite_projects 0.10 redmine_information 1.0.2 redmine_issue_templates 0.2.0 redmine_issues_macros 0.0.1 redmine_landing_page 0.1.1 redmine_login_audit 0.3.3 redmine_monitoring_controlling 0.1.1 redmine_private_wiki 0.2.0 redmine_silencer 0.4.3 redmine_theme_changer 0.3.1 redmine_wiki_issue_fields 0.5.9 redmine_wiki_toc 0.0.4 scrum 0.18.0 sidebar_hide 0.0.8 wiki_graphviz_plugin 0.7.0</p> <p>Best regards, Nitish Hombal</p>			

### History

**#1 - 2018-09-12 16:54 - Go MAEDA**

- *Status changed from New to Closed*
- *Priority changed from Urgent to Normal*
- *Resolution set to Invalid*

Please use forum or contact the author of `wiki_graphviz_plugin` because it is not a problem of Redmine core.
