

Redmine - Feature #29664

Webhook triggers in Redmine

2018-09-23 18:43 - Anonymous

<b>Status:</b>	New	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b> To have Redmine be able to at least use POST method with web hooks upon multiple events, similarly implemented in GitLab or GitHub. This will allow to integrate Redmine into other networks, which people may use for team communication.  Trigger event examples: <ul style="list-style-type: none"><li>• On Issue Created</li><li>• On New Repository Commit</li><li>• On Forum Post</li><li>• On Wiki page edit</li><li>• On Wiki page created</li><li>• On New Document added</li><li>• On New activity</li><li>• On News posted</li></ul> etc  To make it better than GitLab, you can even allow users to input custom JSON <b>subscribe headers</b> and <b>subscribe body</b> in order to make it compatible with any web hook format, else some services might have parsing problems and result in a rejected request.

This would be really nice. I'm trying to join in Camunda BPM into a ticket so a ticket can be assigned a proecess. Webhooks would be wonderful.

Anyone got ideas?

This functional is not realized?

#6 - 2022-04-08 10:31 - Ferdinand S

I would also benefit form this feature greatly. We use Shortcut (shortcut.com) as a Scrum tool and it would be great if we could consume Redmine webhooks in order to update user stories in Shortcut.  
Is there any plan for this feature?
