Category:		Estimated time:	0.00 hour
Target version:			
Resolution:			
Description			
<p>In order for me to even be able to create an issue, I had to create an issue category, a workflow, a tracker, and maybe a couple other things that I cant remember.</p> <p>Perhaps a single very generic setup might be helpful for people to get up and running.</p> <p>Tracker - bugs Workflow - open, assigned, in progress, closed Roles - admin, committer, observer Issue Priorities - low, med, high, show-stopper</p> <p>Those are just some of the things I had to enter into redMine to just be able to open my first bug on my first project.</p>
