Description	
Unfortunately the changelog is currently not as good as it can and supposed to be.	
<ul style="list-style-type: none">- It is hidden (issues log"/projects/redmine/changelog)<ul style="list-style-type: none">-> Have both Roadmap and Changelog as a tab (by default) - Changelog with same features as the Roadmap<ul style="list-style-type: none">> Detailed overview for a version> Version description as see for 0.9 (Make version description multiline and textilizable: #1680 is somewhat related)	
Thanks for the consideration!
