Redmine - Defect #29746
Unexpected results with enumeration formatting in Textile
2018-10-08 16:48 - Holger Just

Status: New
Priority: Normal
Assignee:
Category: Text formatting
Target version:
Resolution:

Description

Consider the following textile example:

#{color:red} is a _shorthand syntax_ used to generate valid HTML,
#{color:blue} is *easy* to read and *easy* to write,
# can generate complex pages,
#{color:green} including headers, quotes, lists, tables, and figures.

According to https://txstyle.org/, this is supposed to render as follows:

txstyle.png

However, In Redmine, it is rendered as follows:

redmine.png

It seems that our Textile library only support formatting for the whole enumeration and ignores formatting on individual elements.

History

#1 - 2018-10-09 09:13 - Go MAEDA

The feature to style list items was implemented in Redcloth 4.2. We have to update RedCloth to support the syntax.
