+1

Since it has no meaning, it should be hidden when printing.

I made a patch, and attach it.

#2 - 2018-10-31 06:30 - Go MAEDA

- Subject changed from Make it possible to uniquely specify the Files element of the wiki page to Hide "Files" section in wiki pages when printing

- Target version set to 4.1.0

#3 - 2018-10-31 06:42 - Go MAEDA

I think adding "hide-when-print" class is better because it is simpler and can clarify the intention to hide the section when printing.

I'm sorry, "hide-when-print" class was better.

I rebuilt a patch.

Please delete the previous patch. (29791-hidden-wiki-attachments.patch)

Committed to the trunk and 3.4-stable branch. Now Files section in wiki pages is hidden when printing.

Thank you for your contribution.
