

## Redmine - Defect #29933

### Strange status jumping in issue workflow

2018-11-08 12:00 - David Chen

<b>Status:</b> New	<b>Start date:</b>
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b> Issues workflow	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	<b>Affected version:</b> 3.4.6
<b>Resolution:</b>	

**Description**

**How to reproduce the bug:**

We knew that when a role with "Edit issues" right could change contents under issues, including status field. You could easily find a bug in current version 3.4.6.Stable by following steps:

1. define a role with "Edit issues" rights. name it "ABC\_Role",
2. add a new issue status, name it "Temp\_Status",
3. in a existing workflow(say workflow\_A), only define ABC\_Role has ability to update status into or out of "Temp\_status",
4. find a project where workflow\_A is in use, choose an existing member(say member\_A), add ABC\_Role to him/her---Now for sure member\_A has right to update status to Temp\_Status,
5. tick off "Edit issues" rights for role "ABC\_Role"

Now you will find user who is in "ABC\_Role" could still jump to "Temp\_status" in relevant issues, even you can't find "Temp\_status" in workflow window.

**My Analysis:**

After studying the database, I found redundant workflow records in "workflow" table after ticking off "Edit Issues" rights.

**Solution:**

When ticking off "update issue" right for certain role, the corresponding rights in workflow should be remove at the same time.
