Somehow I had missed the previous talk on this, but the feature does not show as having been applied, even though it clearly is there on the redmine.org new issue page.

did you found how to use this feature with a current redmine version ? I cant find anything about affected version. Even I can see it on the [www.redmine.org](http://www.redmine.org) system.

why this issue is resolved if it is a dup of [#3824](#) and seems not to be implemented ? should we reopen this ?

Here on redmine.org, "Affected version" is a custom field.

This is a rather important feature. However I don't think it should be implemented by a dropdown, rather it should be a multi-select, because issues can affect multiple versions of software and it's key to track which ones.

Alternatively, although I think it's far from ideal, it could be implemented as a custom field ... if custom fields were changed so that a multi-select kind of list was implemented.

#6 - 2009-11-22 15:43 - Mischa The Evil

- Status changed from New to Closed

- Resolution set to Invalid

Closed this issue as a dup of issue [#1675](#).

**#7 - 2009-11-22 15:43 - Mischa The Evil**

- Resolution changed from Invalid to Duplicate

Fixed resolution.
