Description

Hello, I would like to use the mobile application redminePM on ios.
When I connect with the application no element is displayed.
Should I set some things in Redmine to give access to the application?
Thank you for your reply.

Did you follow the instructions? <http://redminepm.com/faq/>

In any case you'll have to ask to RedminePM developers, I don't think they are related with the Redmine team.

#2 - 2018-11-24 12:24 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Invalid
