Description
You can insert tables to long text custom fields if the "Text formatting" setting for the field is enabled.
But tables don't have borders when displayed if the custom field is normal-width mode. In contrast, borders are displayed as expected in full-width custom fields.

- Status changed from New to Confirmed

- Target version set to Candidate for next minor release

The root cause is the "wiki" class that is missing for the custom fields with text formatting enabled and full width layout not enabled. Are affected all the styles that are applied on the "wiki" class, not only the tables borders.

A patch to add the missing "wiki" class and a test is attached.
