Description				
Hi,				
I'm just using the Redmine program. First of all, I would like to thank everyone who contributed. I created a project. want to define workflows. It's like you don't move from one job to the next. And on the other hand I want to create a work flow diagram. If it's not possible, let's create it.				
Can the above mentioned issues be made? Thank you for your interest.
