Currently projects API returns all trackers, assigned to given project. This is inconsistency with web view, which shows only trackers, visible to the user. They are the only usable to current user anyways.

This is invoked like this: projects/PROJECTID.json?include=trackers

The problem is in redmine/app/helpers/projects_helper.rb, where the line:

```ruby
project.trackers.each do |tracker|
```

should be changed to

```ruby
project.trackers.visible.each do |tracker|
```

Alex Stanev wrote:

```ruby
should be changed to

    project.trackers.visible.each do |tracker|
```

Confirmed the problem. Thank you for catching and reporting this.
I think that `project.rolled_up_trackers(false).visible` is better than `project.trackers.visible`.

I changed it as follows.

```diff
diff --git a/app/helpers/projects_helper.rb b/app/helpers/projects_helper.rb
index 794546163..64d6fea83 100644
--- a/app/helpers/projects_helper.rb
+++ b/app/helpers/projects_helper.rb
@@ -115,7 +115,7 @@ module ProjectsHelper

    def render_api_includes(project, api)
        api.array :trackers do
-            project.trackers.each do |tracker|
+            project.rolled_up_trackers(false).visible.each do |tracker|
                api.tracker(:id => tracker.id, :name => tracker.name)
            end
        end if include_in_api_response?('trackers')
```

I made a patch, and attach it.

### #5 - 2018-12-13 12:32 - Alex Stanev

Hi, thanks for you help!
This approach will also do the trick, can't test it right now.
Also maybe Go will require test for this.
