

## Redmine - Feature #3017

### Adding filters over existing query

<b>Description</b>	
<p>It would be nice if it were possible to add filters over a selected query.</p> <p>For example I have a saved query with all my issues and maybe several other conditions. On top of that I want to be able to add some "manual" filters like Target version (and delete them if needed) using the query as a "base".</p>
