

Redmine - Defect #30182

Inconsistent classification of "ID" class containers for issues

2018-12-11 23:47 - Anonymous

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description In the issue view table on /projects/<your project>/issues, the top bar with column descriptions, has something like: <pre><th class="id"> # </th></pre> however on the issues view on "/my/page" the <a> child of <th class="id"> doesn't have a class "sort desc" assigned anywhere. (Issues assigned to me, reported issues, watched issues blocks to be exact).			

History

#1 - 2018-12-12 01:05 - Anonymous

- Status changed from New to Resolved

this has to do with asceding and descending sorting on each page... my bad

#2 - 2018-12-12 01:07 - Go MAEDA

- Status changed from Resolved to Closed

- Resolution set to Invalid
