

Redmine - Defect #3020

Problem with wiki formatting for inline code with "@" characters

2009-03-21 23:09 - Emil Stepniewski

Status:	Closed	Start date:	2009-03-21
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Wiki	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Duplicate		
Description			
When you use wiki formatting for inline code like this:			
<pre>@<sample text>@</pre>			
you get something like this:			
<pre>&lt;sample text&gt;</pre>			
I mean characters "<" and ">" gets translated to entities. If the text below looks OK, it means the bug was corrected on redmine.org: <sample text>			
No such problem with <bold> or <i><italic></i> formatting.
