

Redmine - Defect #30232

Renaming some of the containers to HTML5 specific tags instead of just DIVs

2018-12-16 10:03 - Anonymous

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description HTML5 has support for new markup tags, like <nav>, <header>, <section>, <article>, <footer> By renaming containers with these tags instead, we could get rid of redundant class and ID definitions for styling, since you will be able to just call them by markup tag.
